rehanmunir.tech | github.com/rehanmunir-dev | Islamabad, Pakistan

Summary

Frontend Software Engineer and UI/UX Designer with **2+ years** delivering 20+ production web applications for international clients — including SaaS dashboards, e-commerce platforms, and full management systems. Core stack: React, TypeScript, Tailwind CSS, Node.js, Figma. Bridges design and engineering: from Figma wireframe to deployed, performant product.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks & Tools: React.js, Tailwind CSS, Node.js, Firebase, Supabase, REST APIs, Figma, Git, GitHub, Vite
Methods: Agile/Scrum, Component-Driven Dev, Design-to-Code, RBAC, System Design

Experience

Software Engineer & UI/UX Designer · Beacon Techh Aug 2025 – Present

- Islamabad
- Architected a shared **React/TypeScript component library**, standardising UI patterns and cutting design-to-dev handoff time across all products.
 - Engineered responsive, cross-browser interfaces to pixel-precise Figma specs, consistently hitting sprint deadlines.
 - Led front-end architecture decisions: component structure, state management, and scalability planning.
 - Translated stakeholder wireframes into production code, reducing revision cycles through upfront specification clarity.

Freelance Software Engineer & UI/UX Designer · Fiverr Mar 2024 – Present

- Remote
- Delivered **20+ web projects** for international clients — SaaS platforms, e-commerce stores, admin dashboards, and 2–3 full management systems.
 - Managed full project lifecycles: scoping, Figma design, React/TypeScript development, REST API integration, and client delivery.
 - Achieved Lighthouse performance scores **above 90** across all projects; maintained high client satisfaction through clear communication and on-time delivery.

Web Developer Intern · Human Appeal Pakistan Feb 2023 – Apr 2023

- Islamabad
- Built and maintained web interfaces for a humanitarian NGO using HTML5, CSS3, and JavaScript best practices.
 - Collaborated with senior developers on production workflows, code reviews, and deployment practices.

Projects

14+ Client Websites & Web Apps *React, TypeScript, Tailwind CSS, REST APIs* 2024 – Present

Delivered 14+ production websites across SaaS, e-commerce, portfolios, and service businesses with full design-to-code ownership. Consistently achieved pixel-accurate implementation and Lighthouse scores **above 90**.

- [SSK Surveillance](#) — B2B security tech, animated stats & lead gen Security
- [Anchorage Phase 2](#) — Real estate platform, investment-focused UX Real Estate
- [Develoscape](#) — Corporate construction brand, architectural aesthetic Construction
- [Brand Aviation](#) — Conversion-optimised agency & aviation site Marketing
- [Ruh Al Quran Institute](#) — EdTech, course booking, global accessibility EdTech
- [+ 9 more projects](#) — See full portfolio on GitHub & Behance Various

Management Systems (2–3 Projects) *React, TypeScript, Node.js, REST API* 2024

- Worked on 2–3 full management systems for clients, handling end-to-end development from Figma design to production deployment.

Portfolio & Design Work *React, TypeScript* 2024

- rehanmunir.tech — Personal portfolio showcasing engineering projects, UI/UX case studies, and client work.
